EXPERIENCE

Founding Full-Stack Engineer

Oct 2025 – Present

Star4ce - dealership retention platform

Irvine, CA (Hybrid)

- Built and deployed a multi-tenant dealership retention platform using **Next.js**, **TypeScript**, **Flask**, and **PostgreSQL**, with 44 tables supporting employee surveys, hiring workflows, turnover analytics, and billing
- Implemented 250+ **REST** endpoints with **JWT** authentication and a 5-role / 50+ permission **RBAC** model, enforcing store-level data access and corporate portfolio permissions
- Designed **PostgreSQL** models for hiring, 90-day success plans, survey scoring, and subscriptions; maintained idempotent schema migrations across **Railway** development and production environments
- Developed dealer workflows and LLM-backed candidate reports across 90+ **Next.js** routes; supported backend validation with a **400+ test pytest suite**

Technical Sales Engineer

May 2025 – Jul 2025

TRSTXCYBER

Huntington Beach, CA

- Integrated client onboarding tools (MDR, dark-web scan) and tightened intake so sales could qualify leads without a custom engineering build

Software Engineer Intern

Feb 2025 – Apr 2025

AcuFlow (Precision Flow Technologies) – pump quoting

Irvine, CA

- Built a production **Flask/MySQL** pump selector that replaced manual catalog lookup, reducing quote turnaround from days to a single session
- Translated manufacturer selection rules into catalog matching based on flow, pressure, materials, and accessories; automated branded PDF quotes and customer/sales email delivery using **ReportLab**
- Deployed the **REST API** on **Heroku** and integrated a WordPress form through a **PHP** proxy to support the live quoting workflow on acuflow.com

EDUCATION

San José State University

Expected May 2028

Master of Science in Artificial Intelligence

San José, CA

- Autonomous Systems Specialization
- **Completed coursework:** Machine Learning (CMPE 257); Deep Learning and Computer Vision (CMPE 297); Artificial Intelligence and Data Engineering (CMPE 252)
- **In progress:** Deep Learning (CMPE 258); Math Foundations for Decision and Data Sciences (ISE 201)

California State University, Fullerton

May 2024

Bachelor of Science in Computer Science

Fullerton, CA

- Dean's List – Cum Laude, GPA 3.61

PROJECTS

RoadAware | *Python, PyTorch, TorchVision, Ultralytics YOLOv8, OpenCV*

[GitHub](#)

- Best **YOLOv8m**: **0.515 mAP@0.5**, **0.734 F1**, and **64.9 FPS** across **8 traffic classes**
- Fine-tuned and compared **YOLOv8m** and **Faster R-CNN ResNet-50 FPN** on **10,000 BDD100K images**, using augmentation, resolution scaling, and repeat-factor sampling for class imbalance

Gap Reconstruction for Autonomous Vision | *Python, OpenCV, PyTorch, LaMa, YOLO*

[GitHub](#)

- Implemented panorama stitching and integration for a **Waymo** multi-camera vision team project using camera-ID gap masks; team evaluation found **LaMa** inpainting did not restore **YOLO** detections in masked fields of view

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript

Frameworks: Next.js, React, Flask, Tailwind CSS

Machine Learning: PyTorch, OpenCV, YOLO, NumPy

Databases: PostgreSQL, MySQL

Cloud/Tools: Railway, Heroku, Stripe, Git, GitHub, Linux

Concepts: REST APIs, JWT/RBAC, OOP
